

COMPANY LEVEL ENVIRONMENTAL SUSTAINABILITY GOALS

At Computech Limited, we are committed to promoting sustainability in all aspects of our business. Our goal is to minimize our environmental impact, support the communities in which we operate, and uphold the highest ethical standards in the use of natural resources. We try to do this by:

1. Waste Reduction

We aim at achieving this through:

- Maximizing recycling and composting across all facilities.
- Reducing overall material consumption and encouraging reuse.
- Partnering with suppliers to minimize waste through sustainable packaging and product lifecycle initiatives.

2. Reduce Water Consumption by 30%

Our aim is to reduce water usage across all operations by 30%. This will involve:

- Reducing water consumption and encouraging efficient water usage in our internal operations.
- Reusing and recycling water where possible.
- Engaging employees and stakeholders in water conservation efforts to foster a culture of responsible water use.

3. Employee Engagement and Education

We continuously engage our employees to make them aware of the below:

- Foster a culture of sustainability by providing education and training on best practices.
- Encourage innovation and creativity to improve sustainability efforts.

4. Increase Renewable Energy Use to 75%

We aim to source 75% of our energy from renewable sources. This will be done by:

- Investing in on-site renewable energy generation, such as solar and wind.
- Partnering with renewable energy providers to power our facilities.
- Increasing energy efficiency across all operations to reduce overall energy consumption.
