ENGINEERING THE FUTURE OF ENTERPRISE IN ANGOLA

ENGINEERING TECHNOLOGY FOR MODERN ENTERPRISE

Who we are

NOVASYS is an enterprise technology company delivering secure, resilient, and future-ready digital infrastructure across Angola.

We partner with organizations operating in mission-critical environments to design, deploy, and operate technology ecosystems that enable operational continuity, scalability, and long-term transformation.

Computech Regional Synergy

As a subsidiary of East Africa's Premier Technology Solutions Partner, **Computech Limited (Kenya)**, we leverage over 38 years of technology excellence.

This strong regional synergy gives us access to a collective pool of 200+ technology experts, certified across crucial multi-vendor paradigms.

REGIONAL STRENGTH WITH COMPUTECH

Backed by regional scale:

Novasys operates with the depth, engineering capability, and institutional maturity of one of Africa's most established technology ecosystems- **Computech Limited**

GLOBAL OEM PARTNERSHIPS

STRONG REGIONAL CUSTOMER PORTFOLIO

OUR CORE SERVICES

WHY PARTNER WITH NOVASYS?

Capability Area	Traditional Local Vendors	Global System Integrators	NOVASYS Advantage
OEM Relationship	Sub-partner status, remote/delayed vendor support channels.	Strong tier relationships, but limited local support teams.	Direct OEM alignment (Tier-1) with native local engineering resources.
Engineering Speed	Broad, non-specialized generalists with high response latency.	Extremely slow processes due to global workflow queues.	Rapid Luanda-based field engineering teams backed by a regional pool.
Enterprise Backing	Minimal financial stability, restricted scope size limits.	Strong framework backing, but high project costs.	Combined stability of Computech's 38+ year regional infrastructure network.
SME Customization	Standard rigid setups lacking modern software capabilities.	Overly complex corporate frameworks that ignore local nuances.	Tailored Zoho and Microsoft assessment tools optimized for the Angolan market.

SECTOR SUCCESS REFERENCES

I&M BANK

Top Bank in E.A

10+ years of trusted partnership with the Bank. A major financial institution with multiple branches across East Africa faced challenges in managing its global communications and network infrastructure. The Bank selected Computech to design a secure, scalable, and compliant solution to enhance customer service, streamline operations, and improve network performance across all its locations. By leveraging Cisco's Cloud Contact Center, IP Telephony, SD-WAN, and Campus Network Solutions, Computech helped the bank transform its IT infrastructure, improve business agility, security, and customer engagement.

EQUITY BANK

Tier 1 Bank in E.A

7+ years of trusted partnership with the Bank. A leading financial institution with over 10,000 employees and operations in multiple countries facing an increasing number of sophisticated cyber threats selected Computech to Design and Deploy an EDR and Encryption Solution to strengthen its cybersecurity framework. The deployment of the Symantec EDR significantly strengthened the Bank's cybersecurity posture. The combination of AI-driven detection, real-time response, and compliance support enabled the organization to mitigate risks effectively while maintaining seamless operations.

DTB BANK

Tier 1 Bank in E.A

12+ years of trusted partnership with the Bank. A major financial institution with over 100 branches faced critical challenges in managing its aging network infrastructure. The bank required a complete network transformation to improve scalability, security and performance while ensuring compliance with stringent financial regulations. To address these challenges, Computech designed and implemented a Huawei Software-Defined Networking (SDN) solution across the bank's data centers, campus LAN, and WAN which helped them achieve a highly scalable, secure, and efficient IT infrastructure.

PRIME BANK

Tier 2 Bank EA

A leading financial institution with multiple branches facing growing cybersecurity risks due to unpatched vulnerabilities in its IT infrastructure selected Computech to consult and design the right Solution to provide an automated, scalable solution to identify, assess, and remediate vulnerabilities across its endpoints, servers, and cloud environments while ensuring compliance with strict banking regulations.

We deployed Qualys VMDR with Patch Management whose automation, Risk-Based Prioritization and scalability helped the Bank stay ahead of evolving cyber threats while maintaining seamless banking operations.

SECTOR SUCCESS REFERENCES

NCBA LOOP

Top Bank in E.A

Supplied, implemented, and supported the Huawei private cloud solution platform for the bank with a deal value of 3 million USD. Supplied, implemented, and supported the Commvault & Huawei Backup platform and Cyber resilience solution (Airgap) for a top bank in Kenya with a deal value of 2 million USD. This solution has greatly improved the bank's data protection and recovery capabilities.

Supplied, implemented, and supported the GPU systems for AI analytics solutions for the entire bank with a deal value of 1 million USD. These systems have enabled advanced data analysis and improved decision-making processes.

DTB BANK

Tier 1 Bank in E.A

Supplied, implemented, and supported production storage solutions for the entire applications and databases with a deal value of 3 million USD.

Supplied, implemented, and supported the Commvault & Huawei Backup platform and Cyber resilience solution (Airgap) for a top bank in Kenya with a deal value of 1 million USD. This solution has greatly enhanced the bank's data protection and recovery capabilities.

Supplied, implemented, and supported core banking infrastructure and technology with Oracle with a deal value of 2 million USD. This has significantly improved the bank's operational efficiency and scalability.

SAFARICOM

Service Provider

We successfully supplied, implemented, and supported the Commvault & Backup platform along with a Cyber resilience solution (Airgap) for the entire bank. This solution, valued at 2 million USD, has significantly enhanced the bank's data protection and recovery capabilities, ensuring seamless data backup and robust cyber resilience.

Additionally, we provided production storage solutions for most of the bank's applications and databases. This initiative, valued at 1 million USD, has optimized the bank's storage infrastructure, ensuring high availability and performance. Our solutions have enabled the bank to manage its data more effectively and improve overall system efficiency.

KPLC

Utility Institution

We successfully consolidated all billing, Enterprise Resource Planning (ERP), and related utility solutions for Kenya into a highly efficient and integrated system.

This comprehensive solution is powered by Oracle Engineered Systems, ensuring robust performance, scalability, and reliability. The implementation of this system, valued at 6 million USD, has significantly streamlined operations, enhanced data accuracy, and improved overall service delivery.

By leveraging the advanced capabilities of Oracle Engineered Systems, we have been able to optimize resource management, reduce operational costs, and provide a seamless user experience for all stakeholders involved.

ENABLING ANGOLA'S DIGITAL FUTURE

We believe the next era of enterprise growth in Angola will be shaped by resilient infrastructure, secure digital ecosystems, and intelligent operations. Novasys exists to help organizations build that future with confidence.
